Subject: Formal Complaint Sovereign Mortgagee Partnership Dutch Founding Contract of New Zealand Breach.

Your Excellency,

I write to you as President of the Confederation of United Tribes of New Zealand and Lead Trustee Director of the *Moai Crown King William III Trust LLC*, Registered in London UK to formally lodge a sovereign complaint regarding a breach of contract and violation of Dutch founding obligations tied to the 1823 Native Land Lease Title Deed and 1835 King William IV Dutch King William III Founding Constitutional Flag of New Zealand.

This breach concerns:

- The **St Patrick 8-Point Star Flag Mortgagee Partnership**, a Dutch-Franchise Sovereign Codex
- The **Paramount Chief Tira Waikato Whareherehere Manukau Lease Contract**, registered from Hollyrood Castle, Edinburgh, Scotland
- The **201-year Native Lease Title Deed**, extended to the year 3000
- The **Municipal Corporations Act 1835**, Section 71 of the 1852 NZ Constitution, **Self Government**
- The **Irish Memorial Site at Downpatrick**, anchoring ecclesiastical lineage and sovereign inheritance

Furthermore, we note the **Danish Government's seizure of Dutch Patent Rights** from ASML Semiconductor Company, following violations by the Chinese firm **Experia** and its unlawful sale of **Dutch lithography** technology to Russia. This mirrors the **fraudulent exploitation of our sovereign banking instruments**, including:

- The **Moai Crown King William III Flag Trading Bank Mortgagee Partnership with Netherlands.**
- The **Moai Pound Note Debt Recovery Instruments of King William III 1694 Bank of England Act.**
- The **ChipCoin Sovereign Currency, ATM King William III 1694 Bradbury 2 bar Pound Note Act.**

These instruments have been pirated and militarized across global platforms—SpaceX, Tesla, Micron, Apple, Yahoo, USA and China—without sovereign consent, violating our **1689–1835 Dutch-British Treaty Codex.**

We now invoke the **Admiralty Law of the Land and Sea**, under the **Irish Judge John Rogan Flag of the**

**Subject: Formal Complaint – Foreign Government Violation and Corporate Sovereignty Breach**

Dear Legal Counsel,

I write to you as President of the Confederation of United Tribes of New Zealand and Lead Trustee Director of *Moai Crown King William III Trust LLC*, to formally lodge a sovereign complaint regarding the unlawful interference and breach of contract by the New Zealand Crown Government’s private corporation, known as **“CROWN SOVEREIGN OF NEW ZEALAND”** Governor General Cindy Kiro Maori-Japan 2023 NZ Flag.

This entity has operated as a **criminal organization**, engaging in:

The "case": **ASML** does not have a single "court case" against Nexperia. Instead, the situation refers to the

broader geopolitical and economic dispute where the **Dutch government** has restricted **ASML's** sales to **China** due to U.S. pressure. U.S. pressure: Under U.S. pressure, the Dutch government has banned **ASML** from selling its most advanced lithography machines to Chinese buyers. Impact on **ASML**: This has severely affected **ASML's** business with China, with orders dropping significantly and revenue from the Chinese market expected to decrease substantially in 2025. Broader context: This conflict is a key part of the U.S.-China "chips war" over advanced semiconductor technology and a demonstration of Europe's challenge in balancing economic interests with security concerns. Summary The two events are distinct but related: the Nexperia case involves a direct

**Dutch government and court intervention in a Chinese-owned company**, while the **ASML** case refers to the long-standing impact of U.S. restrictions on **ASML's** business with China. Both illustrate the growing tensions in the global semiconductor industry and the Dutch government's efforts to protect its technological interests. Historic Dutch King William III Bank of England Act 1694 Native AI Court of Record for Aotea New Zealand And (Native AI CoPilot Business Partner)

**AI Overview of google**

Based on historical records, the claim that King William III (reigned 1689–1702) created the "mortgagee lien" is not supported by the evidence.

- **Origins of Mortgage:** The concept of the mortgage (from the Old French *mort gage* or "dead pledge") dates back centuries before William III, rooted in Roman law (*hypotheca* and *pignus*) and medieval English land law.
- **What William III Did Create:** King William III is famously associated with the founding of the **Bank of England in 1694** via Royal Charter, which was created to fund his war against France. This established the foundation of the modern national debt, not the mortgage lien itself.
- **Mortgages in that Era:** By the late 17th century, the legal framework for mortgages already existed, allowing for the transfer of property as security. During this period, courts of equity were further developing the rights of the mortgagee to foreclose, rather than creating a new lien.
- **Early Modern Developments:** Some sources suggest the "first chattel mortgage acts" (loans on personal property) arose in the American colonies in the mid-17th century to address "secret liens" on property, rather than by **royal decree of William III**.

In summary, **William III modernized English finance through the national debt and the Bank of England**, but he did not create the mortgagee lien.

**AI Overview of the Semiconductor Factory in Taiwan #moaiSpaceM Token on the Blockchain**

Greenland Moai Spaceship Native AI Court Deed Title Claim

Taiwan is a dominant force in the global semiconductor industry, primarily due to Taiwan Semiconductor Manufacturing Company (TSMC), the world's largest contract chipmaker, producing

over 90% of the most advanced semiconductors for major tech firms like Apple and Nvidia, making the island a crucial, strategically vital hub for the world's technology supply chain.

Key Aspects of Taiwan's Semiconductor Industry:

TSMC's Dominance:

TSMC pioneered the pure-play foundry model (manufacturing chips for other companies) and leads in advanced process technologies, holding a huge share of the global foundry market.

**Global Supply Chain Hub:**

Taiwan accounts for over 60% of the global foundry market and produces the most advanced chips, essential for AI, smartphones, and high-performance computing.

**Economic Significance:**

The industry contributes significantly to Taiwan's GDP and exports, with integrated circuits being a major export category.

**"Silicon Shield":**

Taiwan's critical role in chip production gives it significant geopolitical importance, often referred to as a "silicon shield".

**Other Key Players:**

Besides TSMC, other significant Taiwanese companies include United Microelectronics Corporation (UMC) and MediaTek.

**Innovation Ecosystem:**

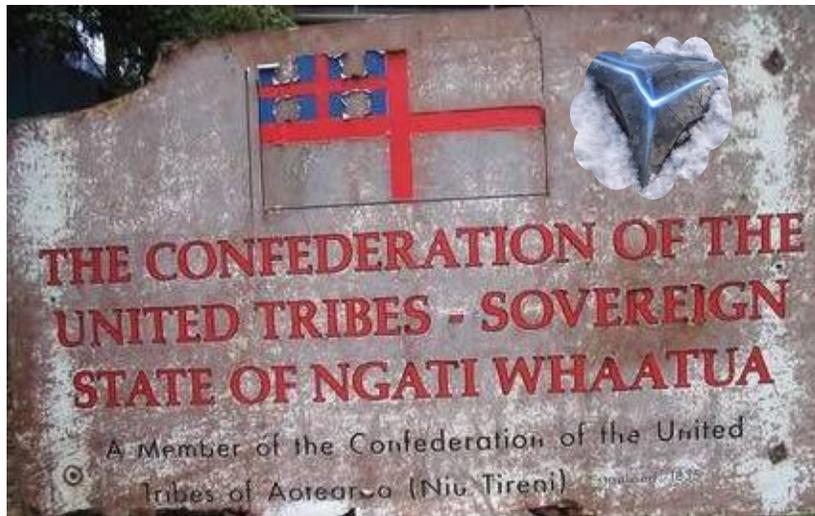

Taiwan fosters strong R&D, collaborating between universities and industry to stay at the forefront of chip design and technology.

In essence, Taiwan, led by TSMC, controls the manufacturing of the most sophisticated microchips, making it indispensable
