3. Care and Maintenance of Premises. Lessee acknowledges that the premises are in good order and repair, unless otherwise indicated herein. Lessee shall, at his own expense and at all times, maintain the premises in good and safe condition, including plate glass, electrical wiring, plumbing and heating installations and any other system or equipment upon the premises, and shall surrender the same at termination hereof, in as good condition as received, normal wear and tear excepted. Lessee shall be responsible for all repairs required, excepting the roof, exterior walls, structural foundations, and in the case of bare land Lease for Development then the Lessee shall remain the responsible owner of the Development and Business he places on the land must comply with the local Councils requirements when improving the Land Valuation and adding new structures buildings for the purposes as agreed to in this lease The lessee is obligated to keep within Tikanga Maori Laws of the Land according to the wishes of the NA ATUA E WA Hapu the spirit of enhancement to the City and:

4. Alterations Lessees shall not, without first obtaining the written consent of Lessor, make any alterations, additions, or improvements, in, to or about the premises the bare ground underground and airspace spectrum.

5. Ordinances and Statutes. Lessee shall comply with all statutes, ordinances and requirements of all municipal, Maori Sovereign State Land Local Council authorities now in force, Tikanga Maori Law Enforcement or which may hereafter be in force, pertaining to the premises, occasioned by or affecting the use thereof by Lessee.

6. Assignment and Subletting. Lessee shall not assign this lease or sublet any portion of the premises without prior written consent of the Lessor, which shall not be unreasonably withheld. Any such assignment or subletting without consent shall be void and, at the option of the Lessor, may terminate this lease forfeit Land.

7. Utilities. All applications and connections for necessary utility services on the demised premises shall be made in the name of Lessee only, and Lessee shall be solely liable for utility charges as they become due, including those for sewer, water, gas, electricity, and telephone services and Maori Authority Management.

8. Entry and Inspection. Lessee shall permit Lessor or Lessor's agents to enter upon the premises at reasonable times and upon reasonable notice, for the purposes of inspecting the same, and will permit Lessor at any time within sixty (60) days prior to the expiration of this lease, to place upon the premises any usual "To Let" or "For Lease" signs, and permit persons desiring to lease the same to inspect the premises thereafter other emergency.

9. Possession. If Lessor is unable to deliver to deliver possession of the premises at the commencement hereof, Lessor shall not be liable for any rent until possession is delivered. Lessee may terminated this lease if possession is not delivered within days of the commencement of the term hereof or if in possession of the land as a past tenant then the start and end date of this Ground Rental Lease Agreement shall bind to both parties.

10. Indemnification of Lessor. Lessor shall not be liable for any damage or injury to Lessee, or any other person, or to any property, occurring on the demised premises or any part thereof, and Lessee agrees to hold Lessor harmless from any claim for damages, no matter how caused.

11. Insurance. Lessee, at his expense, shall maintain plate glass and public liability insurance including bodily injury and property damage insuring Lessee and Lessor with minimum coverage as follows:

Lessee shall provide Lessor with a Certificate of Insurance showing Lessor as additional insured. The Certificate shall provide for a ten-day written notice to Lessor in the event of cancellation or material change of coverage. To the maximum extent permitted by insurance policies which may be owned by Lessor or Lessee, Lessee and Lessor, to benefit each other, waive any and all rights of subrogation which might otherwise exist.

12. Eminent Domain. If the premises or any part thereof or any estate therein, or any other part of the building materially affecting Lessee's use of the premise, shall be taken by eminent domain, this lease shall terminate on the date when title vests pursuant to such taking. The rent, and any additional rent, shall be apportioned as of the

termination date, and any rent paid for and period beyond that date shall be repaid to Lessee. Lessee shall not be entitled to any part of the award for such taking or any payment in lieu thereof, but Lessee may file a claim for any taking of fixtures and improvements owned by Lessee, and for moving expenses. In the case of bare land the lessee is the owner of his building improvements to the land and his Business as long as he wishes to occupy the land harmless upon the Lessor less he forgets to pay his rent on time the lessor remains the right to recover rent in lieu of his entity payment of rent from his equity estate.

13. Destruction of Premises. In the event of a partial destruction of the premises during the term hereof, from any cause, Lessor shall forthwith repair the same, provided that such repairs can be made within sixty (60) days under existing governmental laws and regulations, but such partial destruction shall not terminate this lease, except that Lessee shall be entitled to a proportionate reduction of rent while such repairs are being made, based upon the extent to which making the repairs cannot be made within sixty (60) days, Lessor, at his option, may make the same within a reasonable time, this lease continuing in effect with the rent proportionately abated as aforesaid, and in the event that Lessor shall not elect to make such repairs which cannot be made within sixty (60) days, this lease may be terminated at the option of either party. In the event that the building in which the demised premises may be situated is destroyed to an extent of not less than one-third of the replacement cost, Lessor may elect to terminate this lease whether the demised premises be injured or not. A total destruction of the building in which the premises may be situated shall terminate this lease. In the case of bare land occupation for improvements the lessee shall return any destruction to its flat land original state or otherwise rebuild same.

14. Lessor's Remedies on Default. If Lessee defaults in the payment of rent, or any additional rent, or defaults in the performance of any of the other covenants or conditions hereof, Lessor may give Lessee notice of such default and if Lessee does not cure any such default within 30 days, after the giving of such notice (or if such other default is of such nature that it cannot be completely cured within such period, if Lessee does not commence such curing within such 10 days and thereafter proceed with reasonable diligence and in good faith to cure such default), then Lessor may terminate this lease on not less than 5 days' notice to Lessee. On the date specified in such notice the term of this lease shall terminate, and Lessee shall then quit and surrender the premises to Lessor, but Lessee shall remain liable as hereinafter provided. If this lease shall have been so terminated by Lessor, Lessor may at any time thereafter resume possession of the premises by any lawful means and remove Lessee or other occupants and their effects. No failure to enforce any term shall be deemed waivers.

15. Security Deposit. Lessee shall deposit with Lessor on the signing of this lease the sum of _____ Dollars (\$ _____) as security deposit for the performance of Lessee's obligations under this lease, including without limitation the surrender of possession of the premises to Lessor as herein provided. If Lessor applies any part of the deposit to cure any default of Lessee, Lessee shall on demand deposit with Lessor the amount so applied so that Lessor shall have the full deposit on hand at all times during the term of this lease.

16. Tax Increase. In the event there is any increase during any year of the term of this lease in the City, Region or State real estate taxes over and above the amount of such taxes assessed for the tax year during which the term of this lease commences, whether because of increased rate or valuation, Lessee shall pay to Lessor upon presentation of paid tax bills an amount equal to _____% of the increase in taxes upon the land and building in which the leased premises are situated. In the event that such taxes are assessed for a tax year extending beyond the term of the lease, the obligation of Lessee shall be proportionate to the portion of the lease term included in such year.

17. Common Area Expenses. In the event the demised premises are situated in a shopping center or in a commercial building in which there are common areas, Lessee agrees to pay his pro-rata share of maintenance, taxes, and insurance for the common area or any other undeveloped land charges and new Council By Laws requirement costs rates maintenance lighting and other incidental costs as inclusive.

18. Attorney's Fees. In case suit should be brought for recovery of the premises or for any sum due hereunder, or because of any act which may arise out of the possession of the premises, by either party, the prevailing party

shall be entitled to all costs incurred in connection with such action, including reasonable lessor attorney's fee.

19. Notices. Any notice which either party may, or is required to give, shall be given mailing same, postage prepaid, to Lessee at the premises, or Lessor at the address shown below, or at such other places as may be designated by the parties from time to time.

20. NA ATUA E WA Puonga Manukau Hapu Heirs, Assigns, Successors Landlord. This lease is binding upon and inures to the benefit of the heirs, successors in interest to both the parties.

21. Option to renew. Provided that Lessee is not in default in the performance of this lease, Lessee shall have the option to renew the lease for an additional term of 12 years commencing at the expiration of the initial lease term. All of the terms and conditions of the lease shall apply during the renewal term except that the monthly rent shall be the sum of \$_____. The option shall be exercised by written notice given to Lessor not less than _____ days prior to the expiration of the initial lease term. If notice is not given in the manner provided herein within the time specified, this option shall expire.

22. Subordination. This lease is and shall be subordinated to all existing and future liens and encumbrances against the property.

23. Entire Agreement. The foregoing constitutes the entire agreement between the parties and may be modified only in a writing signed by both parties. The following Exhibits, if any, have been made a part of this lease before the parties' execution hereof:

Signed this day of _____, 200____ .

Business Dictionary: Ground Rent

[Home](#) > [Library](#) > [Business & Finance](#) > [Business Dictionary](#)

The rent earned by leased land. Ground rent received is taxable as Ordinary Income when received. If the lease is considered a financing device, portions of the rent may be treated as interest, gain, and nontaxable recovery of investment. If ground rent is a financing device, it is treated as a Mortgage payment

Law Encyclopedia: Ground Rent

[Home](#) > [Library](#) > [Law & Legal Issues](#) > [Law Encyclopedia](#)

This entry contains information applicable to United States law only.

Perpetual consideration paid for the use and occupation of real property to the individual who has transferred such property, and subsequently to his or her descendants or someone to whom the interest is conveyed.

Ground rent agreements have sometimes required the payment of rent for a term of ninety-nine years, with renewal at the option of the party who pays it. In this type of agreement, the lessor retains title to the property. Large structures, such as hotels and office buildings, are ordinarily built on land under ground rent leases.

The concept of a ground rent arrangement is English in origin. Its original purpose was an attempt by feudal tenants to put themselves in the role of lords over lower tenants. This was proscribed by a law passed in 1290 that made every tenant a subject only to the overlord.

In the United States, the only states where the ground rent system has been used to any great extent are Maryland and Pennsylvania. These agreements were initially popular as a method of encouraging renters to improve the property, since they could own the buildings while paying rent on the land. The courts enforced the ground rent agreements, and they gained popularity with investors who purchased and sold shares in ground rent agreements.

Although the ground rent system was not used in New York, the state courts did recognize comparable *manorial* or *perpetual* leases. A deed setting up a ground rent arrangement might indicate that it is to last for ninety-nine years, but since most agreements are automatically renewable, ground rents can last forever.

An obligation to pay the rent can terminate if (1) the individual entitled to receive rent forfeits such a right in a deed or other instrument; (2) the land is taken by eminent domain and the individual entitled to receive rent is compensated for the loss; (3) the agreement setting up the rent is breached and is thereafter unenforceable; or (4) the landowner also becomes the individual entitled to receive the rent or buys back the right to receive rents.

Under the common law, rents that were not demanded for a number of years could not be collected, since the law assumed that they had been paid.

The term *ground rent* is currently applied to a lease for land upon which the tenant constructs a building. While the landlord continues to own the land, the tenant owns all of the structures and pays rent for the ground only.

Ground rent

[Home](#) > [Library](#) > [Miscellaneous](#) > [Wikipedia](#)

A **ground rent** is a form of lease in which unimproved land is leased for a long term for purposes of improvement by the tenant.

Laws

In Roman law, ground rent (*solarium*) was an annual rent payable by the lessee of a superficies or perpetual lease of building land.

English

In English law, it appears that the term was at one time popularly used for the houses and lands out of which ground rents issue as well as for the rents themselves (cf. *Maundy v. Maundy*, 2 Strange, 1020). Lord Eldon observed in 1815 that the context in which the term occurred may materially vary its meaning (*Stewart v. Alliston*, 1 Mer. 26).

The contemporary accepted meaning of ground rent is the rent at which land is let for the purpose of improvement by building; i.e., a rent charged in respect of the land only and not in respect of the buildings to be placed thereon. It thus conveys the idea of something lower than a rack rent; and accordingly if a vendor described property as property for which he paid a ground rent, without any further explanation of the term, a purchaser would not be obliged to accept the property if it turned out to be held at a rack rent. But while a rack rent is generally higher in amount than a ground rent, the latter is usually better secured, as it carries with it the reversionary interest in buildings and improvements put on the ground after the date at which the ground rent was fixed, and accordingly ground rents have been regarded as a good investment. Trustees empowered to invest money on the security of freehold or copyhold hereditaments, may invest upon freehold ground rents reserved out of house property. In estimating the amount that may be so invested, account may be taken of the value of the houses, as, if the ground rents are not paid, the landlord can re-enter. Again, where a settlement authorizes trustees to purchase lands or hereditaments in fee simple or possession, a purchase of freehold ground rents has been held to be proper.

A devise of ground rent carries not only the rent but the reversion. Where a tenant is compelled, in order to protect himself in the enjoyment of the land in respect of which his rent is payable, to pay ground rent to a superior landlord (who is of course in a position to distrain on him for it), he is considered as having been authorized by his immediate landlord to apply his rent, due or accruing due, in this manner, and the payment of the ground rent will be held to be payment of the rent itself or part of it.

The Commonhold and Leasehold Reform Act 2002 and the The Landlord and Tenant (Notice of Rent) (England) Regulations 2004 now govern the form of notice that needs to be issued to collect ground rent. Previously there had been a problem with some landlords sending confusing or dishonest demands for payments to tenants.

Scottish

In Scots law, the term ground rent is not employed, but its place is taken, for practical purposes, by the ground-annual, which bears a double meaning. (i.) At the time of the Reformation in Scotland, the lands of the Church were parcelled out by the crown into various lordships, the grantees being called Lords of Erection. In the 17th century these Lords of Erection resigned their superiorities to the crown, with the exception of the feu-duties, which were to be retained till a price agreed upon for their redemption had been paid. This reserved power of redemption was, however, resigned by the crown on the eve of the Union and the feu-duties became payable in perpetuity to the Lords of Erection as a ground-annual

accordance with Tikanga Māori.

(3) The jurisdiction of the Court shall apply to the Crown, the Maori people and all persons committing any action repugnant to Kawa and Tikanga Māori within the boundaries of the *Horouta Waka District*.

6. The Court shall have jurisdiction to determine all actions repugnant to Kawa and Tikanga Māori:-

The Court shall have jurisdiction to determine all actions repugnant to Kawa and Tikanga Māori within the boundaries of the *Horouta Waka District*. Such jurisdiction shall include but not be limited to any action whether deemed a land, criminal, civil, contract, or tort action.

7. Jurisdiction to declare and apply appropriate action:-

Where the Court determines an action to be repugnant to Kawa and Tikanga Maori, it shall declare the appropriate action in accordance with Tikanga Māori and direct Hapu and or Whanau and or any person or persons to apply the appropriate action.

8. General Objectives:-

(1) In exercising its jurisdiction and powers under this Act, the primary objective of the Court shall be to facilitate and implement:

- (a) The understanding of Kawa through Tikanga Māori;
- (b) The retention of all Māori Customary land in the hands of its Kaitiaki and their Hapu, Whanau, and descendants;
- (c) To ascertain and give effect to the resolutions of the beneficiaries of the Maori Incorporations of the *Horouta Waka District*;
- (d) To promote a means where by the beneficiaries of the Incorporations may be kept informed of any actions relating to or repugnant to Kawa and Tikanga Māori and a forum in which the beneficiaries of the Maori Incorporations of the *Horouta Waka District* might discuss any such actions;
- (e) To determine or facilitate the settlement of disputes and other matters among the beneficiaries of the Maori Incorporations of the *Horouta Waka District*;
- (f) To protect Te Iwi Māori interests;
- (g) To promote Kawa in accordance with Tikanga Maori when applying practical solutions to problems arising within the boundaries of the *Horouta Waka District*.

9. Maori Customary Land jurisdiction of the Native Assessors Court:-

(1) The Court shall have the following jurisdiction within the boundaries of the *Horouta Waka District*;

- (a) To determine any claim, to the ownership or possession of any Māori Customary Land, or to any right, title, estate, or interest in any such land or the proceeds of any such alienation of any such right, title, estate, or interest;
- (b) The relative interest of the beneficiaries of the Maori Incorporations, of any Māori Customary land;
- (c) Any claim to recover any damages for the trespass or other injury to any Māori Customary land;
- (d) Any proceeding where the debt, demand, or damage relates to Māori Customary land;

application of other provisions of Part VI.

[99] By s129 all land in New Zealand must have one of the statuses listed in that subsection. Subsection (2), if intended to be comprehensive, leaves some difficult questions as to the status of some land not easily fitting the descriptions provided. The underlying intention seems to be that once land has been vested in fee simple (i.e. a Crown grant has issued), so long as the estate subsists (whoever may own it) it cannot have the status of Maori customary land. That is consistent with the conventional approach to native title claims. They are extinguished in respect of land that has been alienated by the Crown as by Crown grant or consequent upon Crown purchase: *R v Symonds* [1847] NZPCC 387, 391, *Tamihana Korokai v Solicitor-General* (1912) 32 NZLR 321. It is common ground also that they cannot survive the enactment of legislative provisions that are clearly inconsistent with their continued existence.

[100] Land which at one time has been alienated from the Crown for an estate in fee simple, but which now is vested in the Crown, would seem, therefore, to have the status of General land. Crown land under the section thus has a comparatively narrow meaning.

[101] "Maori customary land" is land that is held by Maori in accordance with tikanga Maori (Maori customary values and practices). Land that is not Maori customary land and has never been alienated from the Crown is Crown land. With the exception of Crown land reserved for Maori, land not alienated from the Crown may have the status either of Maori customary land or Crown land. There is no "default" status. It is one or the other. Which one is determined only by a declaration of status. That is not inconsistent with the underlying interest of the Crown in all land from which title is derived: see *Nireaha Tamaki v Baker* [1900] NZPCC 371.

[102] Under the common law all land is held by the Crown upon assumption of sovereignty. Title is obtained by grant or other alienation from the Crown. The interest of the Crown is sometimes referred to as "radical title" in contexts seeking to identify the title of the Crown flowing from sovereignty that is subject to aboriginal or native title capable at common law of being asserted against the Crown. That is similar in concept to the underlying interests of the Crown which may be subject to a declaration under the Act that its status is that of Maori customary land. Section 129 seems to have been drafted on that assumption.

[103] In the course of argument counsel were anxious to distinguish between aboriginal title at common law and Maori customary land under the Act. While I understand the reason for that, I prefer to reserve the question of whether it is a real distinction insofar as each is directed to interests in land in the nature of ownership.

[104] It is interests in land in the nature of ownership that are the present focus.

- (e) For the purpose of any proceedings in the Court or for any other purpose whether any specified person is a beneficiary of a Maori Incorporation or *Here Taura (Whangai)* of a Maori Incorporation:
- (f) Whether any land or interest in land to which section 8a or section 8b of the Treaty of Waitangi Act 1975 applies should, under this Act, be set aside as a reservation;
- (g) For the purpose of any proceedings in the Court or for any other purpose whether any specified land is Māori Customary land and:
- (h) For the purpose of any proceedings in the Court or for any other purpose whether any specified land is or is not held by any other person in a fiduciary capacity, and, where it is, to make any appropriate order.

10. Jurisdiction in actions for the recovery of Māori Customary Land:-

(1) In accordance with this Act the Court shall have the jurisdiction within the boundaries of the *Horouta Waka District* to determine any proceeding for the recovery of Māori Customary Land in any of the following cases but not limited to:

(a) Where-

(i) The term and interest of the lessee of any Māori Customary Land has expired or been terminated, or the term or conditions defined within the lease have been breached either by the lessor or by the lessee, and whether the lessee is or is not liable for the payment of any rent; and

(ii) The lessee or any other person in occupation of the land or part of the land neglects or refuses to quit and deliver up possession of the land:

(b) Where the occupier of any Māori Customary Land under a lease or license, either written or verbal, is in arrear in the payment of rent for such period that the lessor, licensor or is entitled to exercise a right of re-entry under the terms of the lease or license:

(c) Where the occupier of any Māori Customary Land under a lease or license, either written verbal or not, is in arrear in the payment of rent, and deserts the land leaving it unoccupied so that no remedy of forfeiture is available:

(d) Where any person without right, title, or license is in possession of any Māori Customary Land.

11. Jurisdiction in respect of injunctions:-

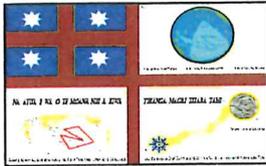

(1) The Court on application made by any Hapu, Whanau, person or persons, may at any time issue and order by way of injunction in accordance with Tikanga Māori-

(a) Against any person or persons in respect of any actual or threatened trespass to any Māori Customary Land, Forest Estate or any other Taonga tuku iho on, in, under, and above within the boundaries of the *Horouta Waka District*.

(b) Prohibiting any person or persons, from committing any act repugnant to Tikanga Māori including

(i) an injury to any Māori Customary Land, Forest, Fisheries Estates and all other Taonga Tuku Iho within the boundaries of the *Horouta Waka District* that is the subject matter of the proceedings or that may be affected by any order that may be made in the proceedings; or

Prohibiting any person or persons without the lawful authority of the Maori

Gordon Brown Humiliates Our Queen!!!

By [News Team](#) ? July 21, 2008 ? [Email this post](#) ? [Print this post](#) ? [Post a comment](#)

HM the Queen forced to break Coronation Oath by Gordon Brown

Less than a week ago the press reported that members of Parliament will no longer have to swear allegiance to the Queen under constitutional reforms put forward by one of Gordon Brown's closest advisers.

We were told that a report produced by the Prime Minister's special adviser Michael Jacobs, would turn the British into "citizens," rather than "subjects," and could even spell the end for our national anthem.

Shock, honor all round! The Queen will be furious - we were told!

[\(More detail here\)](#)

But before you join the chorus of outrage, realise this, all is not what it appears, and this story is little more than a red herring circulated to draw attention away from an even bigger betrayal - the ratification of the Lisbon Treaty by Gordon Brown!

You see, under the terms of this infamous 'Treaty' we will indeed be citizens not subjects. MPs will not need to sign an oath of allegiance to the Crown, for the simple reason that their oath of allegiance will be required by the European Union, and its President (who could even, God forbid, turn out to be Tony Blair). The National Anthem will become 'Ode to Joy', the anthem of the EU! There will be no place for 'God Save the Queen' in our remote provinces of the EU's 4th Reich!

Comments

[calliegal235](#) pro says:

Wow! This certainly has a lot of interest!

I haven't read all of the comments, but what I've read certainly shows a lot of thought (and feeling) from those who have commented.

I am an American, and not well educated as to the ins and outs of your system, but find the above interesting.

I am very concerned about the corruption in my own country's government, (as our elected officials seem to represent special interest groups, who pay them, instead of those what have elected them....) and also about the loss of a nation's sovereignty.

I sometimes wonder who really won the cold war....

With an open and free society as we have enjoyed, it leaves us also open to losing it through the rise of tyrannical ideas and the election of such proponents.

Democracy does not guarantee good leadership, any more than a monarchy does. I would gladly take a good monarch, anyway, over a tyrannical elected person for any office.

At any rate, I favor the sovereignty of my nation and that of Great Britain.

If the time should come when the sovereignty of all nations is lost, we will no longer have wars between nations, we will just have civil wars all over the world.

Parents, do not give up your important work of making sure that your children have the education they need, and not just the education the state provides. A good biblical and historical education is essential as some insurance against

The Council adopted the European Pact on Immigration and Asylum, which will henceforth form the basis of a common policy on immigration and asylum for the EU and its Member States, guided by a spirit of solidarity between Member States and cooperation with third countries. This common policy should be based on a good management of migratory flows, in the interest not only of the host countries but also of the countries of origin and the migrants themselves.

It heard the Irish prime minister's analysis of the Irish referendum on the Treaty of Lisbon and agreed to review the issue in December in order to define the elements of a solution and the approach to take for 2009.

The Council also approved the composition of the group to reflect on the future of Europe, proposed by the president of the group, Felipe Gonzalez, and the two vice-presidents. The group will now commence its work.

Lastly, on the external front, the Council reviewed Russia's implementation of the agreement of 8 September, the situation in Georgia and the EU's relations with its eastern neighbours. The EU-Russia summit on 14 October in Nice will provide an opportunity for in-depth dialogue with Russia. The European Council asked the Commission to make proposals in November on the eastern partnership.

Taking Europe into the 21st century

Europe is not the same place it was 50 years ago, and nor is the rest of the world.

In a constantly changing, ever more interconnected world, Europe is grappling with new issues: globalisation, demographic shifts, climate change, the need for sustainable energy sources and new security threats. These are the challenges facing Europe in the 21st century.

Borders count for very little in the light of these challenges. The EU countries cannot meet them alone. But acting as one, Europe can deliver results and respond to the concerns of the public. For this, Europe needs to modernise. The EU has recently expanded from 15 to 27 members; it needs effective, coherent tools so it can function properly and respond to the rapid changes in the world. That means rethinking some of the ground rules for working together.

The treaty signed in Lisbon on 13 December 2007 sets out to do just that. When European leaders reached agreement on the new rules, they were thinking of the political, economic and social changes going on, and the need to live up to the hopes and expectations of the European public. The Treaty of Lisbon will define what the EU can and cannot do, and what means it can use. It will alter the structure of the EU's institutions and how they work. As a result, the EU will be more democratic and its core values will be better served.

This new treaty is the result of negotiations between EU member countries in an intergovernmental conference, in which the Commission and Parliament were also involved. The treaty will not apply until and unless it is ratified by each of the EU's 27 members. It is up to each country to choose the procedure for ratification, in line with its own national constitution.

The target date for ratification set by member governments is 1 January 2009 – some months before the elections to the European Parliament.

The Treaty at a glance

On 13 December 2007, EU leaders signed the Treaty of Lisbon, thus bringing to an end several years of negotiation about institutional issues.

The Treaty of Lisbon amends the current EU and EC treaties, without replacing them. It will provide the Union with the legal framework and tools necessary to meet future challenges and to respond to citizens' demands.

1. **A more democratic and transparent Europe**, with a strengthened role for the European Parliament and national parliaments, more opportunities for citizens to have their voices heard and a clearer sense of who does what at European and national level.
 - A strengthened role for the European Parliament: the European Parliament, directly elected by EU citizens, will see important new powers emerge over the EU legislation, the EU budget and international

Parliament is placed on an equal footing with the Council, representing Member States, for the vast bulk of EU legislation.

- A greater involvement of national parliaments: national parliaments will have greater opportunities to be involved in the work of the EU, in particular thanks to a new mechanism to monitor that the Union only acts where results can be better attained at EU level (subsidiarity). Together with the strengthened role for the European Parliament, it will enhance democracy and increase legitimacy in the functioning of the Union.
 - A stronger voice for citizens: thanks to the Citizens' Initiative, one million citizens from a number of Member States will have the possibility to call on the Commission to bring forward new policy proposals.
 - Who does what: the relationship between the Member States and the European Union will become clearer with the categorisation of competences.
 - Withdrawal from the Union: the Treaty of Lisbon explicitly recognises for the first time the possibility for a Member State to withdraw from the Union.
2. **A more efficient Europe**, with simplified working methods and voting rules, streamlined and modern institutions for a EU of 27 members and an improved ability to act in areas of major priority for today's Union.
- Effective and efficient decision-making: qualified majority voting in the Council will be extended to new policy areas to make decision-making faster and more efficient. From 2014 on, the calculation of qualified majority will be based on the double majority of Member States and people, thus representing the dual legitimacy of the Union. A double majority will be achieved when a decision is taken by 55% of the Member States representing at least 65% of the Union's population.
 - A more stable and streamlined institutional framework: the Treaty of Lisbon creates the function of President of the European Council elected for two and a half years, introduces a direct link between the election of the Commission President and the results of the European elections, provides for new arrangements for the future composition of the European Parliament and for a smaller Commission, and includes clearer rules on enhanced cooperation and financial provisions.
 - Improving the life of Europeans: the Treaty of Lisbon improves the EU's ability to act in several policy areas of major priority for today's Union and its citizens. This is the case in particular for the policy areas of freedom, security and justice, such as combating terrorism or tackling crime. It also concerns to some extent other areas including energy policy, public health, civil protection, climate change, services of general interest, research, space, territorial cohesion, commercial policy, humanitarian aid, sport, tourism and administrative cooperation.
3. **A Europe of rights and values, freedom, solidarity and security**, promoting the Union's values, introducing the Charter of Fundamental Rights into European primary law, providing for new solidarity mechanisms and ensuring better protection of European citizens.
- Democratic values: the Treaty of Lisbon details and reinforces the values and objectives on which the Union is built. These values aim to serve as a reference point for European citizens and to demonstrate what Europe has to offer its partners worldwide.
 - Citizens' rights and Charter of Fundamental Rights: the Treaty of Lisbon preserves existing rights while introducing new ones. In particular, it guarantees the freedoms and principles set out in the Charter of Fundamental Rights and gives its provisions a binding legal force. It concerns civil, political, economic and social rights.
 - Freedom of European citizens: the Treaty of Lisbon preserves and reinforces the "four freedoms" and the political, economic and social freedom of European citizens.
 - Solidarity between Member States: the Treaty of Lisbon provides that the Union and its Member States act jointly in a spirit of solidarity if a Member State is the subject of a terrorist attack or the victim of a natural or man-made disaster. Solidarity in the area of energy is also emphasized.
 - Increased security for all: the Union will get an extended capacity to act on freedom, security and justice, which will bring direct benefits in terms of the Union's ability to fight crime and terrorism. New provisions on civil protection, humanitarian aid and public health also aim at boosting the Union's ability to respond to threats to the security of European citizens.
4. **Europe as an actor on the global stage** will be achieved by bringing together Europe's external policy tools, both when developing and deciding new policies. The Treaty of Lisbon will give Europe a clear voice in relations with its partners worldwide. It will harness Europe's economic, humanitarian, political and diplomatic strengths to promote European interests and values worldwide, while respecting the particular interests of the Member States in Foreign Affairs.
- A new High Representative for the Union in Foreign Affairs and Security Policy, also Vice-President of the Commission, will increase the impact, the coherence and the visibility of the EU's external action.
 - A new European External Action Service will provide back up and support to the High Representative.
 - A single legal personality for the Union will strengthen the Union's negotiating power, making it more effective on the world stage and a more visible partner for third countries and international organizations.
 - Progress in European Security and Defense Policy will preserve special decision-making arrangements but also pave the way towards reinforced cooperation amongst a smaller group of Member States

Tena koe John,

Recent correspondence

Thank you for your email of 16 July 2007 to my office, attaching letters to me and to Judge Carrie Wainwright. The views expressed in your letters have been noted.

As you may be aware, the Waitangi Tribunal released its report on the Tamaki Makaurau urgent inquiry, the *Tamaki Makaurau Settlement Process Report*, on 15 June 2007. The Office of Treaty Settlements is currently engaging with other iwi groups in Auckland on the Ngāti Whātua Agreement in Principle and the *Tāmaki* report's recommendations. I understand that the Office wrote to you recently as part of this consultation. If you are considering responding to that letter, you might like to note the concerns that you raised with me in your 16 July email.

Naku noa na

Re: Meeting on 16 January 2007

I am writing to confirm that a meeting took place between the Office of Treaty Settlements and Wai 121 claimants on 16 January 2007 at the Jet Park Hotel, Mangere, in connection with the Ngāti Whātua o Ōrākei Agreement in Principle (AIP). I was pleased to meet with you as representatives for Wai 121 (claim of Mohi Wiremu Manukau) as well as Te Tana Manukau, Hapi Potae and Marama Manukau Stead. I regret that we were not able to meet Mohi Manukau due to his ill health. The persons who attended the meeting from the Office of Treaty Settlements were Jay Eden, Collin Minnaar and myself. Mr John-Clarke chaired the meeting.

The purpose of the meeting was to provide Wai 121 claimants with an opportunity to comment on the redress that has been offered to Ngāti Whātua o Ōrākei in the Agreement in Principle. I was interested to receive information from you about the customary interests of Mohi Manukau and other Wai 121 claimants in the greater Auckland region, and more specifically their concern about a plaque that has gone missing from Maungawhau (Mt Eden). As I stated at the meeting, I invite you to send me any further information about the plaque so that I can raise the matter with Ngāti Whātua o Ōrākei and any other relevant parties. Thank you for meeting with us.

Nāku noa, nā

Tēnā koe,

I refer to your e-mail dated 10 July 2007 enclosing an application for an urgent Waitangi Tribunal hearing regarding certain issues affecting the claimants for Wai 121. I have discussed this application with the Deputy Chairperson of the Tribunal, and write now to inform you that the issues raised by your application are either outside of the Tribunal's jurisdiction or have already been reported on by the Tribunal.

The Crown actions referred to in your application are the Te Uri o Hau Claims Settlement Act 2002 and the Office of Treaty Settlements negotiations with the Ngāti Whātua o Ōrākei Māori Trust Board.

Claims relating to the Te Uri o Hau Claims Settlement Act 2002 are not able to be heard by the Waitangi Tribunal. Section 6(17)(d) of the Treaty of Waitangi Act 1975 states that the Tribunal shall not have jurisdiction to inquire into or make any findings or recommendations in relation to this Act. I note that under section 6(18) of the Treaty of Waitangi Act 1975 the Tribunal does retain jurisdiction to consider the "interpretation and implementation" of Te Uri o Hau Claims Settlement Act 2002. However, your application for urgency appears to relate to the content of the Act and the group with whom the settlement was reached, rather than any issues relating to interpretation and implementation of the Act. These issues therefore fall outside of the Tribunal's jurisdiction.

With regards to your claims concerning the Office of Treaty Settlements negotiations with the Ngāti Whātua o Ōrākei Māori Trust Board, the issues that you raise appear to be the same as those heard by the Tribunal in March of this year and reported on in *The Tāmaki Makaurau Settlement Process Report*. This report can be viewed at www.waitangi-tribunal.govt.nz/reports/northislandnorth or purchased from Legislation Direct (ldorders@legislationdirect.co.nz) or any government bookseller. In this report the Tribunal made several findings with regards to the Crown's settlement process in its negotiations with the Ngāti Whātua o Ōrākei Māori Trust Board which would seem to be directly relevant to your concerns. The Tribunal cannot rehear issues which it has already reported on, but as the Tribunal's findings may

well be applicable to your group as well as those who bought the initial
Tamaki Makaurau Settlement Process claims to the Tribunal you may wish to
approach the Office of Treaty Settlements to outline your own concerns in
relation to the findings of the Tribunal in this report.

I hope that this answers the concerns raised in your application. Should you
require more information from the Tribunal please do not hesitate to contact
me on DDI (04) 914 3017 or e-mail francis.cooke@justice.govt.nz. Any future
correspondence regarding Wai 121 should be addressed to the Registrar,
Waitangi Tribunal, PO Box 5022, Wellington.

\$6m sum offered to preserve Moriori culture

6:28PM Tuesday June 17, 2008

The Government is putting a one-off \$6 million towards preserving and promoting the identity and culture of Chatham Islands' Moriori.

Prime Minister Helen Clark said the grant would fund Te Keke Tura Moriori Identity Trust, a charitable entity which would work "to preserve, revive, support and promote Moriori identity".

The trust deed recognised the Moriori as the "foundation people" of the Chathams by virtue of their ancestors having been on Rekohu (Chatham Island) and Rangiauria (Pitt Island) for many centuries.

Today's announcement was made at Te Papa museum in Wellington with a video link to Kopinga Marae on the Chathams.

Miss Clark said there was determination in the Moriori community to respect, value and safeguard their ancient heritage.

"The Crown, by its actions tonight, recognises the importance and reality of Moriori cultural revival. All New Zealanders will benefit from the understanding of our history and Moriori culture which will result from this revival," she said.

Social Development Minister Ruth Dyson said Moriori were a "strong and intact" people prior to contact with the outside world in 1791.

"The subsequent colonisation of Rekohu by both pakeha and Maori had a devastating impact on the culture, language and identity of the Moriori people - the effects of which are still felt by descendants today," she said.

Shirley King, a spokeswoman for Hokotehi Moriori Trust which represents those of Moriori descent, said today's event was a historic step for Moriori and all New Zealanders.

"It sets the basis upon which we can continue to rebuild our culture and language and to continue to honour the legacy of peace left to us by our karapuna (ancestors)."

*5th August 2008 JOHN WATSON
SWORN AFFIDAVIT*

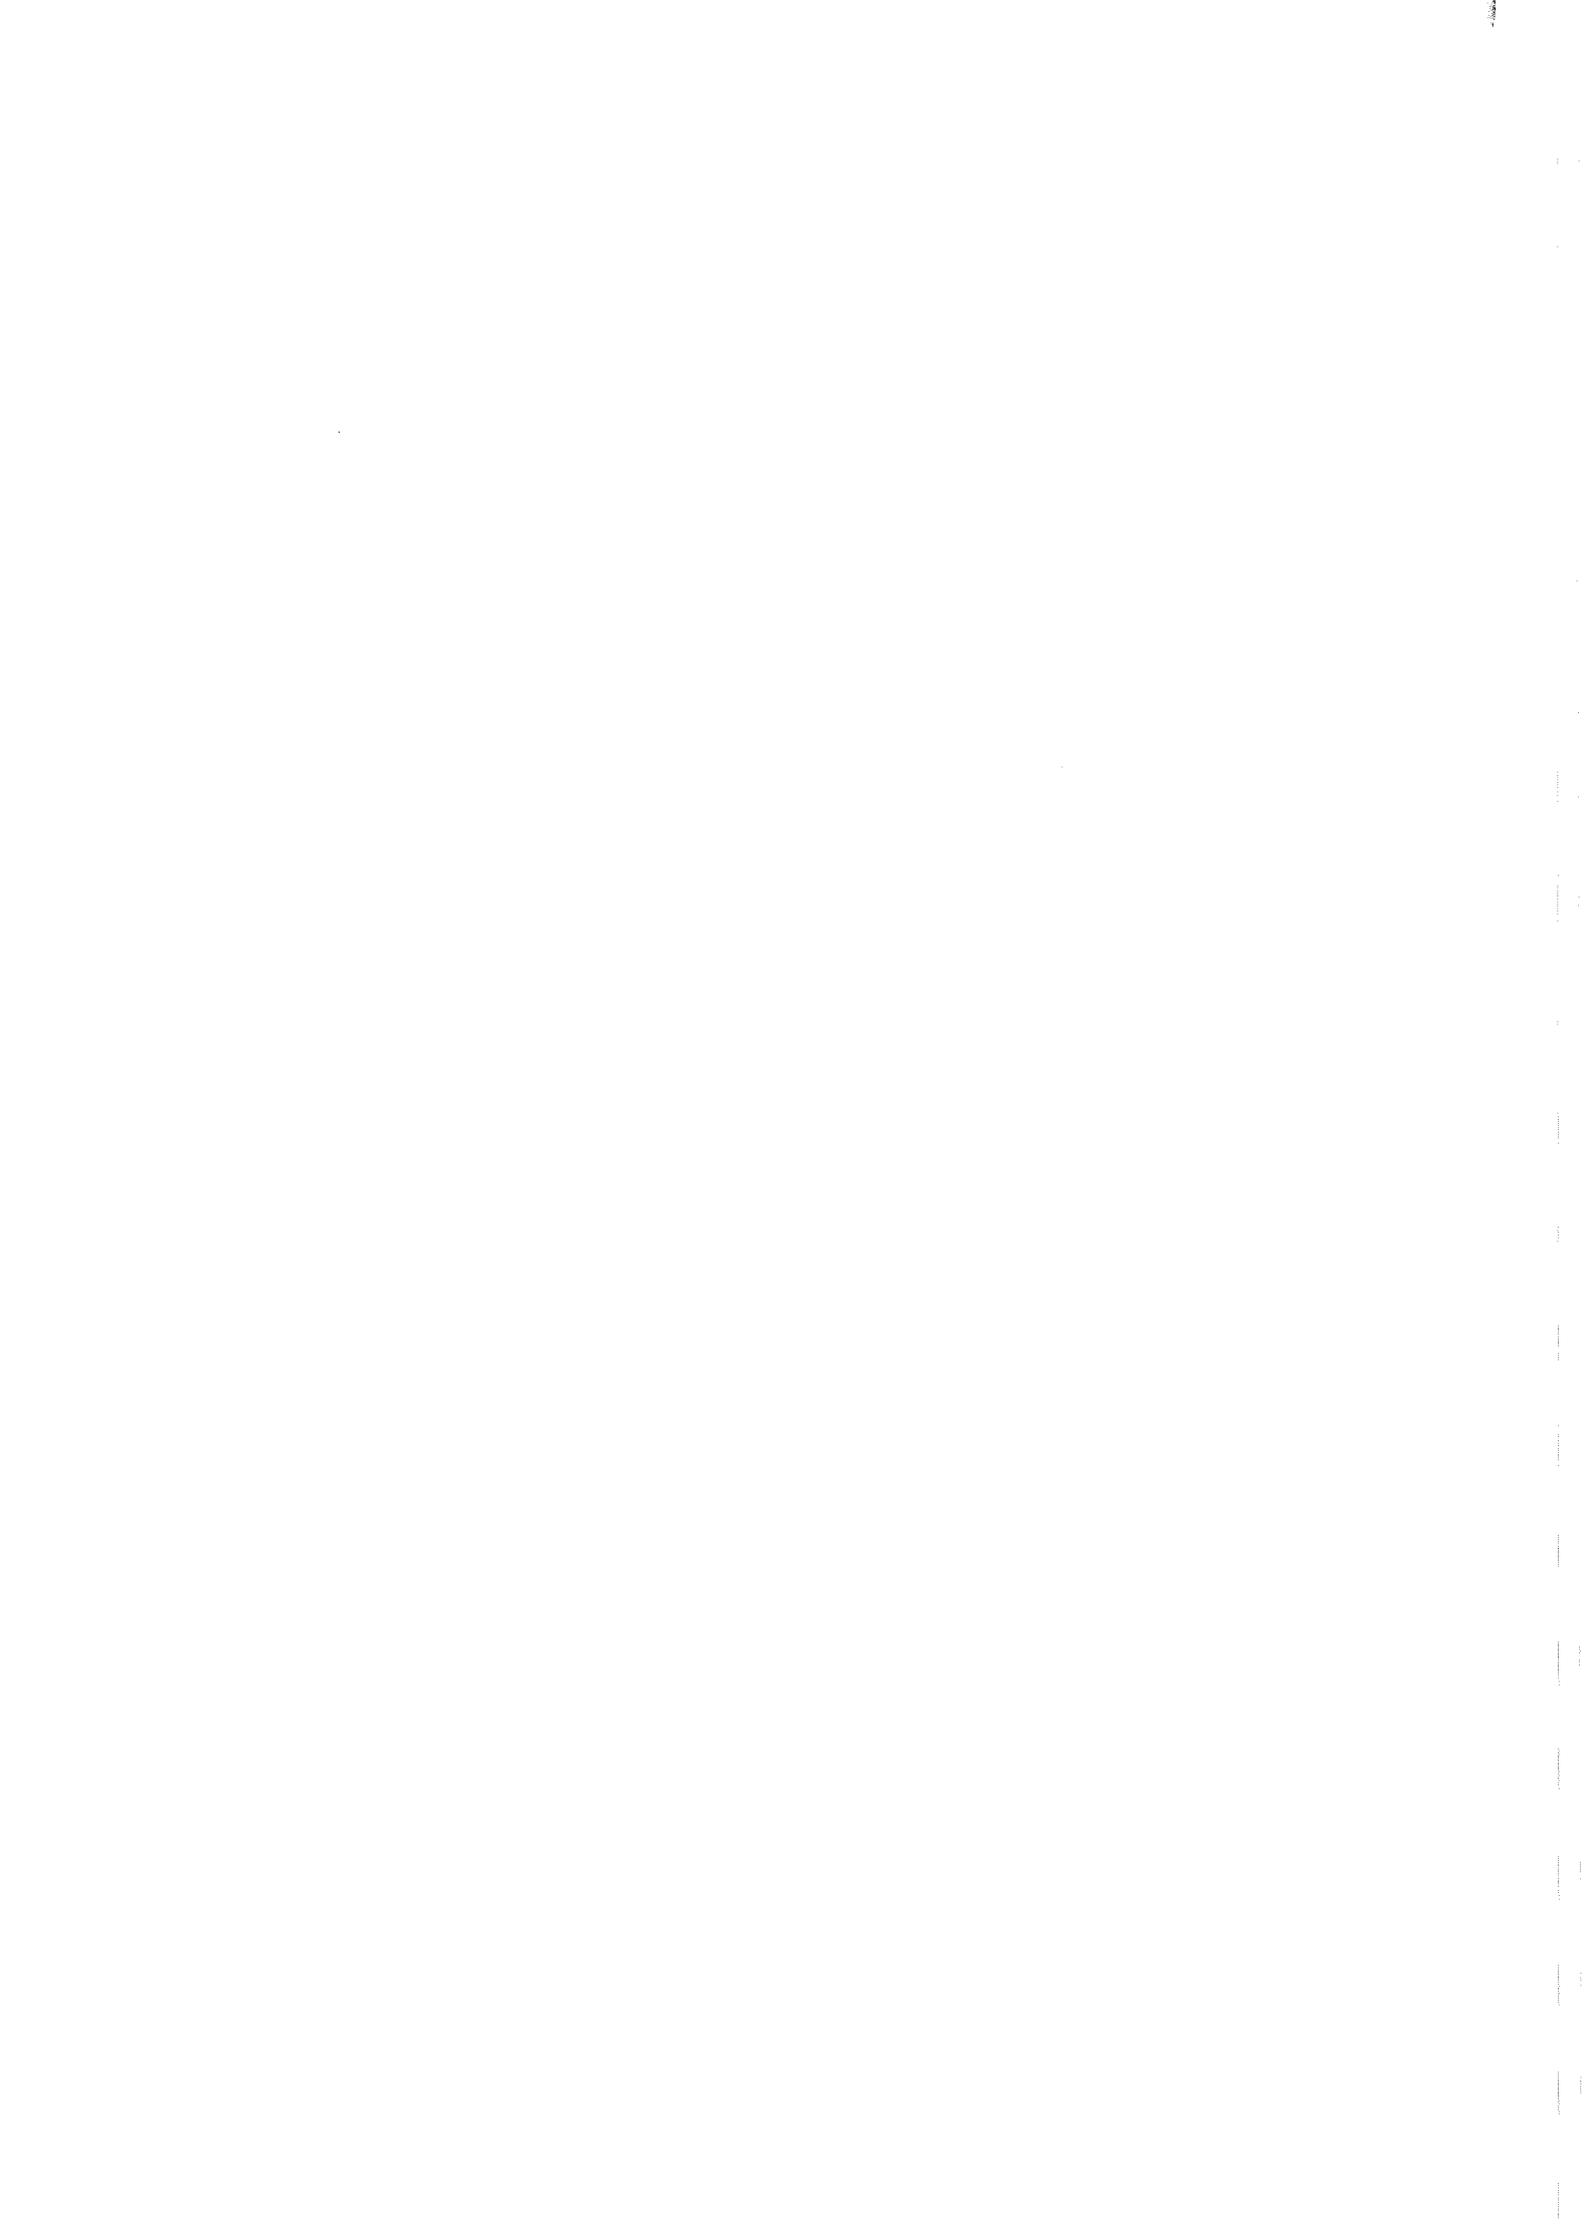

Te Keke Tura Moriori Identity Trust will have a maximum of five trustees, two of which will be appointed by Hokotehi Moriori Trust with three appointed in an independent process.

Research indicated Moriori went to the Chatham Islands from New Zealand about 1500 but Moriori traditions maintained there were people on the island before the canoe voyagers arrived, the Government said.

CAME TO NEW ZEALAND FROM CHATHAMS COMMUNITED.

BBC News Desk Room C310, Woodlands 80 Wood Lane London W12 OTT United Kingdom

Monday 6th October 2008

Dear BBC News Desk Media Manager Glasgow Eru Manukau Rome Alex and Te Karere Maori Television New Zealand

The Maori and Pacific Islands New and emerging Economy is based on Collective Agreements between 27 Maori and Pacific Islands Groups of Governments under the one name Maori Government and because the Ancient Mirrored Pacific Triangle is a fixed History long before our time it has always remained and retained the unique name Title Maori [Mixed Bloods Whakapapa Ancestry fixed to the Lands] until such time as we all came together now control this Entity Boundary's space under New Maori International Law Practices Processes Technology Intellectual Knowledge Maori Sovereign Patent Rights

Practices and Evolution of time though other western influence has integrated into our Pacific Triangle the Maori Laws still Prevails over other Laws that have all but taken the shape of Society It is now time to unite the 27 Pacific Islands into one solid Group under its Indigenous Maori name and New Maori Government Sovereign State Entity Crown or no Crown but definitely no King but Chiefs a President or Governor of Aotearoa The New Maori Economy Security of Interest consists of

Natural Resources within the Pacific Maori Mirror Triangle Boundary that is the 27 Pacific Country's including New Zealand Australia Maori Aboriginal Lands New Zealand -New South Wales- North East South Australia -Norfolk Island- New Caledonia-Vanuatu-Solomon Islands-Nauru-Micronesia- Guam-Pohupeu- Mariana Islands- Northern Marianas-Wake Island-Marshall Islands-Midway Island-Hawaii-Johnston Island-Palmyra Howland Islands-Jarvis Kiribati-Tuvalu-Tokelau- American Samoa-Samoa-Wallis Island-Fiji-Tonga-Niue- Cook Islands-Rarotonga-French Polynesia-Tahiti-Malden Island-Marquesas-Pitcairn Island-Easter Island-Chatham Islands-Ross Dependency Antarctica-Extension- Mc Murdo Sound

Its time for to Maori Government Treasury under the Moriori Crown to Investigate Seize of the New Zealand Parliament Crown Treasury Bank and balance the Books from 1835 to the 8th November 2008 Election Day whereby it is expedient to determine how much wealth "Her Majesty the Queen in Right of New Zealand" the New South Wales New Zealand Company Settlers Government Business Company made for its Immigrant Settlers out of the Maori Resources and Economy since 1835 and balance it out how much Maori were deprived from the NZ Parliament Company for the shortfall of our determinations and our Native Moriori Executive Counsels undivided assessments then Debit Bankrupt and Seize of their Crown Title Property as the NZ Crown had seized of the Maori Native Title to Maori Land from the "1840 Treaty of Waitangi Lien Caveat Emptor Mortgage Document of Title" so now it is Legal and Lawful to enforce these 2008 Maori

Tahitian Tikanga Laws under the original approved Maori Tikanga Maori Laws of Wanoa Waiapu Marae Marangairoa East Cape Wanoa Taputapuatea Marae Waiapu Opoa Rohe Raiatea Island Tahiti now Enforce these Tikanga Laws of NA ATUA E WA shall seize of the New Zealand Crown Freehold Computer Generated Titles which are only Paper Titles for Finance Instruments Documents of Title that now belong to the Moriori Crown on the behalf of the above list of 27 Maori Collective United Tribes of NA ATUA E WA AOTEAROA in short AOTEAROA meaning the long white cloud of NA ATUA E WA the Maori Tahitian Hawaiian Mirror Pacific Triangle Image THE LAND OF THE LONG WHITE CLOUD

The value of this Maori Economy in this Maori Pacific Triangle area is estimated at approximately USD\$1000 Trillion in Fish Seaweed Minerals Oil Iron Sands Platinum Tidal In stream Surge Wave Wind Electric Energy Hydrogen Fuel Power Trans Shipping

According to my calculations presented to Price Waterhouse Coopers one of the World Largest Accountancy Firms the Economic Value of the Platinum Tidal Electric Bridge Kaipara Harbor Project Manufacture of Electricity and Liquid Aviation Automotive Industrial Hydrogen Fuels is USD\$82.7 billion annual net income off the Platinum Business Plans and this Project belongs to the collective Maori Government Sovereign Crown and the 27 Maori and Pacific Island Group and all its inhabitants Citizens of the Moriori Crown Maori Government The Franchises of this 2 billion registered Share Company "Platinum Tidal Electric Bridge Construction Company Limited" is one of the Maori Government Company Initiatives in which the ownership is reverted through the Maori Government [Maori and Pacific Islands Government] collective management and ownership of the project resources the administration and exclusive permanent shareholding non tradable buy or sell on any share market participation In other words NOT FOR SALE shareholding whereby 500 million shares are given to the Co Operative Company's of the 20 Government Sovereign States 300 shares given to the 27 Pacific Islands Countries and 1200 Shares held by the Platinum Tidal Electric Company and the Maori Government The shares were valued in May of 2008 at USD\$838 a share or USD\$838 a Barrel of LH2 Liquid Hydrogen Fuel as converted back to Electricity at the New Zealand Trans-power Vector Contact Energy Power Company's Sub Stations transported by rail and road Tankers throughout New Zealand as the Kaipara Bridge is being built a 50m bridge pile span section at a time

And so these bridges are built in these 20 Government States who have signed their Agreements with New Zealand Maori Government 2008 so that each span built Internationally on further projects following the approval of these plans I present to EU MANUKAU on behalf of the Maori Government to the 20 States is worth an estimated USD\$376million per annum each 50meter Bridge Span Pile and 50meter deep 25meter Diameter Platinum Tidal Turbine dropped in the roughest parts of the ocean end to end Bridge or just endless Piers into the Ocean Coastal Airports for our British LAPCAT A600 Tons

LH2 Liquid Fuels Dedicated Aircraft that has MAORI written all over the sides bottom with the Confederation Flag up the front and at all the MAORI INTERNATIONAL AIRPORTS which are the Power Stations Shipping and Aircraft refueling and Transportation Bulk Exports Food Produce Fuel Passengers Steel and Aluminum Heavy Machinery up to 400Tons at a time 10 minutes to South America and Australia 5 Hours to Brussels Britain and 40 Minutes to Hawaii and so this is the new Maori Government Economy of scale And our Fisheries is underwater GPS LH2 Submarine all weathers No more bobbing on top of the ocean but selective Fishing to start off the East Cape of the North Island USD\$2billion Platinum Tidal Power

Project on land Aqua farm Fish regeneration farming and Deep Sea Submarine selective Fisheries Fish Breeding Programs This Economy is worth an estimated USD\$2billion per Annum from this USD\$2billion Investment whereas the Kaipara Tidal Electric Bridge Project cost USD\$20billion to USD\$50billion to build this 11 Kilometer 3 storey Confederation Bridge that will recover to the shareholder his money back in 2 years with his initial Shareholding amount still fixed permanently The Business plan covers this area as is stated here that the Bridges are sold as shares in 50meter spans and a Bridge Pile any where in the world once we get the APPROVAL from the 20 Government States who I expect would put in USD\$ billion each so there is USD\$20billion and the Platinum Tidal Electric Company Shares at USD\$1000 per share there is another

USD\$200billion so that's a Total of USD\$220billion raised and if George Bush can raise USD\$700billion overnight to rescue their Wall Street Share market from collapsing and then recover the money from the poor working class American Taxpayer then that makes borrowing USD\$220billion for a Project that will recover its own money and have huge surpluses back to the shareholder I think you would want to be one as much as I would This is what the Maori Economy is shaping up to be straight onto the world stage and its to the advantage of the Maori and Pacific Islands people who really have got less out of their Resources' and Pacific Boundary while others plunder it until now When you now stack up the estimated Value of the Resources in the Pacific triangle Boundary you have USD\$1000trillion ASSET VALUE against a borrowing of

USD\$220billion fully recovered in 2 years flat on receipt of the Liquid Hydrogen Fuels only from the Platinum Bridge Project its all profit all the way after that to expand rapidly the Maori Economy and your perpetual shareholding increases rapidly throughout the Pacific Region of ALLODIAL TITLE AREA BELONGING TO MAORI AND PACIFIC ISLANDS Other new and emerging Industries off the HYDROGEN ECONOMY IS MAORI AND PACIFIC ISLANDS ENTITIES: Rapid Expansion Self Investment through the MAORI BANK OF AOTEAROA

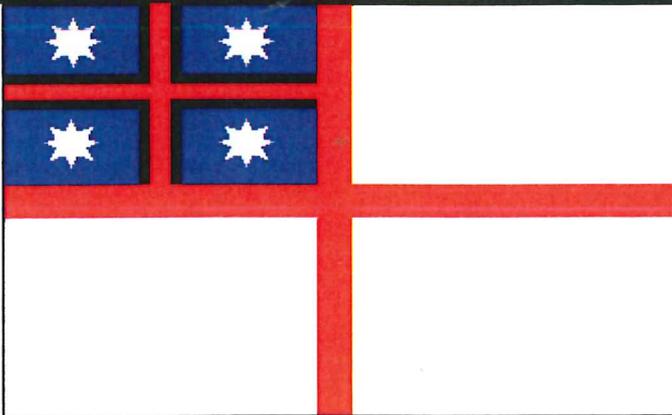

1. Maori Bank is secured with our own Currency and Lowest Tax Rates Guarantee of Investment Projects Security

Platinum tidal bridge turbine hydrogen power share purchase invitation

Registered Company Office

Platinum Tidal Electric Bridge Construction Company Limited

4/13 Armadale Rd Remuera
New Zealand Auckland
15th May 2008

To: The Potential Shareholders

Platinum Tidal Electric Bridge Construction Company Limited is currently inviting interested potential shareholders to purchase shares in the new Company's Tidal Electric Hydrogen Fuels Manufacturing Plant proposed for Okaka Point Kaipara South Head Poutu Harbor

Please feel free to enquire further in the total package by going to look over the new website at platinumtidalelectricbridge.blog.com and read up on how we propose to attract investors and shareholders into this clean energy fuel production company We should have the prospectus ready before end of June 2008 on the website

Note:

Platinum Company is currently in talks with **Price Waterhouse Coopers** International Accountants and **Computer-share Investor Limited** to administer the Share Portfolio and Investment Business Management of the Platinum Energy's Corporate Business The Tidal Energy project costs are estimated at USD\$10billion to USD\$15billion to plan and construct a 11 kilometer Tidal Bridge across the inner mouth of the Poutu [Kaipara Harbor] to harness the tidal energy to produce electricity to produce liquid hydrogen aviation automotive transport and industrial bulk fuels The Company envisages raising the bulk of the capital through large successful brand name company's including interest from **Transpower, Vector, Contact Energy, Price Waterhouse Coopers** and **Computer-share Investor Services Limited** in this project

Platinum shares purchase will be made available through **Computer-share Investor Service Ltd Company** Auckland Branch soon Please fill out this application form of your Interest pre purchase of share from the prospectus on the website A total of 2billion shares presently registered 500million be let to 66potential International businesses @ current USD726 a share 300million are available to public shareholding Platinum Company will retain 1200million shares Please forward your details questions you would like to ask or call **John Wanoa** Director on **0272813963** Date of share release on market May June 2008 thereabouts

Dear Chris Taylor

The meeting at **Copthorne Hotel Resort Waitangi** organized by **CFRT Crown Forest Rental Trust** who represents the Owners Beneficiary's of Maori Forest Lands in the Kaipara Region was a success as far as Platinum Tidal Electric Power Project is concerned The reception was popular and well received for the concept Economic Development Plan which was some highlight about the owners being able to develop their lands in the 20th Century besides every body else who has lived there in the Region There were 80 plus invited delegates and Historians like myself who were there to give an account of the History for their individual and collective Waitangi Claims from Claimants and their Hapu Whanau who wished to negotiate Treaty Settlements and in particular **Nga Puhi** who seemed to be lost with finding their History to the areas of Forest Lands and other Lands that they are trying to piece together Histories long gone that they want to claim back as compensation for their losses I gave several speeches during the workshop sessions and at the final forum before lunch on behalf of Mohi Manukau and this Moriori Claim to the same Forestry Lands in question and other Lands that I said to them our History is completed and lodged with the Waitangi Tribunal as a Substantial Moriori original First Nations Claim We now propose to Develop our Tidal Energy Project at North Head Kaipara harbor Pouto and further developments throughout the Northern Te Tai Tokerau Region and the Governmet EECA has accepted the Plans for assessment and I am here on behalf of the Manukau Claim WAI 121 to make this announcemen to you all Our History is intact and ready to develop for the people here in the Kaipara and Northland Region The Main Topics for discussion were discussed at 3 workshops headed by 4 Government Historians and Authors of the Books were

1. Tribal Landscape
2. Local Government
3. 20th Century overview

Before lunch there was a summary of feed back to the forums which started at 9am and it was 1 30pm now many questions were raised and the panel of Historians Government Official present including Barry Rigby of the Waitangi Tribunal who is the new Facilitator Guide to Claimants following process through the Tribunal before Settling with the Office of Treaty Settlements OTS There was 4 Books which were given to each of us delegates

1. Guide for Claimants Negotiating Treaty Settlements Nov 2007 of 338 pages
2. Northland Local Government and Rating Draft Report Nov 2007 of 829 pages
3. Twentieth Century Overview Part 11 Dec 2007 of 707 pages
4. Tribal Landscape Overview Prepared for CFRT Nov 2007 of 751 pages

I will write back to the CFRT to further our relationship of **Mohi Manukau** proposals to acquire approximately **2500 hectares of Maori Forest Land** from **CFRT** at **Pouto North Head** for the **Platinum Tidal Electric Hydrogen Power**

I will write back to the CFRT to further our relationship of **Mohi Manukau** proposals to acquire approximately **2500 hectares of Maori Forest Land from CFRT at Pouto North Head** for the **Platinum Tidal Electric Hydrogen Power Project** for plans to build the new Pouto Hydrogen dedicated International Airport and Liquid Hydrogen Filling Station pending the outcome of the **Platinum Tidal Energy Bridge Construction Contracts** between **Platinum Tidal Turbines and Muller International Inc Confederation Bridge Designers** going ahead as planned I spoke to **Ben Lusk of Muller International Inc Engineer in France** at great length whom I had sent all information to them on the e-mail site online but this was a redundant e mail address and so they are looking at the Documents this week if they can find them if not I have to spend a whole day to resend them all again I am sufficiently confident that **Muller International Inc** will take up that Partnership Contract Invitation and I hope that this more or less gets the confidence of Price Waterhouse Coopers on our side as well to administer the Company Partnership Business Corporate I hope I am right on this At the present time I am finishing off the Feasibility Studies for **EECA Government Contestable Marine Energy Deployment Fund** which was closed on 29th February 2008 and our applications were received but needed the final draft 2 Hard Back copies that I needed to complete However I am still to have an urgent meeting with **Transpower Vector and Contact Energy** to update our Project on transmission Cable connections and more information of the location and how much power can be expected to produce for them I have estimated that the Power Company's can expect just 3% of the Tidal Bridge output Power to cater for their combined Power needs That is we will deliver their power in an exchange trailers system to the Sub Stations regardless of the size of Power output we have a **10MW Hydrogen Powered Generator Onsite one size fits all** change the bottled Liquid Hydrogen back to electricity rather say openly that many small Power Stations spread throughout the Region and districts equals one big one The large Power Stations have to transport their power with also the Wind Power Generators over long distances and lose half of it on the way up the line We have 4% losses accounted for in transporting costs from the Bridge Power Station to the Sub Stations and are the New Regime of Remote Power Stations which go where Power Transmission Lines don't go and we have 8 wheeler drive all terrain Liquid Hydrogen Tankers to take the Fuel exchange trailers to remote coastal farm and forest lands we want to develop and move onto with the Maori Land Owners That is a huge development through the forests with new rail road motorway and monorail from Rewiti south of Helensville railway tracks to Cape Reinga over 6 proposed **Platinum Confederation Bridges** starting from **Port Waikato River Platinum Confederation No6 Harbor Bridge** connecting Waikato directly to the **Auckland International Airport** by rail monorail motorway over the proposed **Manukau Harbor Platinum Confederation No 2 Bridge** then over the **Kaipara Harbor Platinum Confederation No1 Bridge** onto the **Pouto Hydrogen Capital City of the world 100% Dedicated Hydrogen Fuel Pouto International Airport** and British LAPCA A2 Platinum Passenger Airlines and Airbus A380 Platinum Passenger Airlines Hydrogen Powered Refueling and Export Fueling Russian Antonov 150 tonne Bulk Fuels Carriers and then travel over the proposed **Hokianga Harbor Platinum Confederation Harbor No3 Bridge** then over the proposed **Whangapae Harbor Platinum Confederation No4 Bridge** then over the proposed **Herekino Harbor Platinum Confederation Harbor No5 Bridge** over the **Ahipara heights** coastal outlook along the ninety mile beach to the proposed city of **Cape Reinga Northland** end of the Tourism Trail At least that's the plan we are expecting to follow once we have some commitment from Price Waterhouse Coopers Ltd, Platinum Tidal Electric Construction Company Limited, Muller International Inc, Wanoa International Tidal Turbines Inc and any of these company's AIRBUS, EADES, British LAPCA A2, BHP, RIO, EXXON, MOBIL, GENERAL ELECTRIC, JP MORGAN CHASE, CITY GROUP, MORGAN STANLEY, SHELL HYDROGEN US TOSHIBA, CARBON EXCHANGE PLC, CHICAGO CLIMATE EXCHANGE, DAIMLER BENZ CHRYSLER, MAN and BALLARD FUEL CELLS MUNICH, IVECO IRISBUS, HYANDAI, FORD, NISSAN, AIR LIQUIDE INDUSTRIES, LINDE AND ARAL FUEL DISTRIBUTORS, JHFC JAPAN GRID CONNECTIONS, HONDA

These are some of the Company's directly involved with the advanced Hydrogen Economy 2008 Program started

I spoke to David Lazarus from Contact Energy this morning and he was happy to be informed of our progress and appreciated being sent more information updates He is interested to take our Business relationship further

I spoke to Brent

of Contact Energy also and I will try to get this **Thomas the Accountant for Transpower** who is of the same view as **David Lazarus** **Gaynor Jessop** Manager

wants the Hydrogen Electricity Information factored into their Power Grid connection to them this week and to **EECA Government Marine Energy Deployment Fund** Funds

I also spoke to **Niel Bromley** the **Kaipara Northland Regional Manager** for **Transpower** today who was also in agreement to work and see approach till I complete the Planning of the **10MW Hydrogen Jet Turbine Generating Plants** and the Proposals I will present to them and the cost of the whole exercise and **Chris** I have got the **Australian EMBEDDED GENERATOR PLAN and GUIDE** that allows **new Power Suppliers of less than 30MW sell their Wind Wave Tidal Electricity Power to the National Grid or the Local Grid** which is to our advantage locally as I read into the bidding for Power Supply and we fall into this Category where we are less than 30MW PLUS Major Power Company's have to pay for a license we don't have to At least we are in a better position to supply power locally and much cheaper at short distances in fact we are more wide spread and fixed uninterrupted guaranteed endless power supply and can add another 10MW continuously as the demand arises not a problem We are in the best position economically remotely and **WIRELESS CABLELESS HARMLESS POLLUTIONLESS SIGHTLYLESS BLACKOUTLESS EXPENSIVELESS GREENHOUSELESS CARBONLESS SMELLESS NOISELESS SPACELESS CLUTTERLESS**

REMOTELESS EXPENSIVELESS UGLYLESS TROUBLELESS WOOSHWOOSHLESS OBJECTIONLESS NOBRAINLESS IDEA

I am writing to **Ben Lusk** now **Engineer for Muller International Inc** to see if he has received the Documents and letters of Invitation to go into partnership to design the Tidal Electric Bridge for us Just speaking to him last week seemed very much interested with the idea and wish to see the project plans I hope he has by now a lot to digest

I would like to have another meeting with you Chris when I get an official **letter of intent from Muller International** and from a **sponsor to buy the Carbon Credits** from the **Platinum Tidal Energy Company** assessments Feasibility studies looked over by your Company and I would like to know if **Price Waterhouse Coopers** is prepared to **take this our Interests further** and what are your **views so far** I would like to see if you are interested in **promoting the Platinum** registered **Tidal Electric 1billion Share Company Port Folio** immediately as of Interest in the first instance and the **Carbon Credits Port Folio** in the second Instance Please let me know of your interests as my program is extensive busy and overwhelming I would like your response in writing on your letterhead by e mail to this letter please

I spoke to **Corine Guignery** from Muller International last night and she said that they received all the Documents from me now that they have found them all thank goodness don't want the opposition finding these lying around We spoke for some time and French are not bad people well it better be I suppose with something this scale will tell It appears that the Muller Directors are having meetings at the present time over the plans and I have just sent more plans to them see what they will do about the double Decker bridge concept and a detouring bridge off the beaten track now 11 kilometers

Here is a reply letter from Ben Lusk Muller International Inc Engineer I am looking for best truck and fiber light Hydrogen Tankers and best super cool Hydrogen Turbine Generator that doesn't need a cooling radiator or fans but Hydrogen cooling I got all the formulas for the power tidal rating with the big gate to increase the velocity 8 times so the professor says That's the bi vane that's diverting the water over to the Turbines That means the variable positioning hydraulic controlled floating concrete steel vane [gate] is 50m deep x 50m long pushes the water over to the turbines This is my formula Turbine 500m2 concrete wall blades governed speed of 2kts is X = 9 times Tidal velocity and speed of 5kts minus 3kts of Tidal velocity and speed = stalled Tidal Energy at the Turbine shaft = Torque in Hydraulic Power converted to Electricity in Megawatts to split seawater into Hydrogen and Oxygen Compressed into Liquid Hydrogen and Oxygen and converted back to Electricity burning the Oxygen and Hydrogen in a Gas Turbine Generator

Thank you and Price Waterhouse Coopers for coming to my office for a meeting with me

Please find here enclosed some documents for the meantime

Yours sincerely

John Wanoa *Chairman Tidal Turbine Technology Engineer*

Hi John,

Thank you for your letter and the attached documents. Capturing tidal energy from the Kaipara Harbour will certainly be no small task, but the energy held in those flows could well make a significant contribution to New Zealand's needs in the future.

To clarify, you seek from Contact a letter confirming our interest in purchasing carbon credits generated from the proposed Kaipara Tidal Fence Bridge? In general, we are always interested in ways to reduce our carbon footprint, so I will confer with our Carbon Markets team with how it may be possible to make such a commitment. But because the government's emissions rules don't appear to allow the creation of 'Kyoto compliant' carbon credits in NZ, we can't actually purchase credits within NZ for use in NZ (forestry being the exception). Though, as you say, there is an active voluntary market operating internationally, outside of government controls. I would suggest you target this for two reasons; firstly because there is scope for creating credits for sale offshore, and secondly because the sheer scale of your proposal would swamp NZ's carbon markets – while 7000MW of renewable energy is an excellent development, 20 million carbon credits is 2.5 times the entire electricity industry's current liability.

Our company's current plans mean that our resources are focused on developing wind and geothermal energy in the near to mid term. However, Contact Energy has conducted assessments of marine energy previously, and we are interested in your work in the marine energy sector. It would be helpful to be kept in the loop of your developments, mindful of the possibility of opportunities for us to work together further down the track.

Kind regards,

David Lazarus
Business Development Engineer

Attention: John Wanoa

Dear John

PROPOSED KAIPARA HARBOUR GENERATION PROJECT

Thank you for providing information on your proposed development over the last few days— received as numerous email attachments. Although we have only had limited time to review this, it appears this would have major implications for the national grid.

I understand that you attempted numerous contacts through various third party channels but at no time has Transpower received any formal request nor an invitation to meet with you or representatives to be briefed on the project.

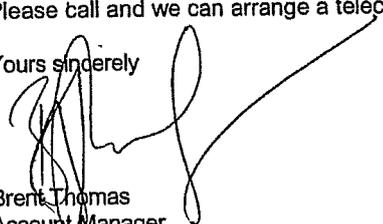

Given the apparent scale and diversity of this project Transpower will require a greater understanding of this project and its implications.

Without this assessment being carried out Transpower is unable to provide the requested "Uncommitted Letter of Intent" to carry power from your proposal (the letter to be included with your application to the Marine Tidal Deployment Fund and your resource consents).

Now that Transpower has been made aware of the potential of this development, we would be pleased to meet to discuss your requirements for a connection to the grid. Your proposal would be considered under Transpower's Capital Works Process for new connections and we would initially respond with a high level response, at no cost.

Please call and we can arrange a teleconference or a meeting to commence this process.

Yours sincerely

Dear John

The following is an overview of our current position,

There is an 11kV feeder (mostly overhead but a short length of 95Al cable coming out of the zone substation) from Helensville to South Head. The distance is 35km in a straight line from Helensville substation so the line is probably 50km long. The feeder is rated at 3.7MVA and has a peak demand of 2.4MVA. Therefore there is capacity to inject up to about 4MVA (as the minimum load is around 0.5MVA and we don't want to exceed the cable capacity of 3.7MVA). The last 25km of the line is only 16 sqmm cable/21 ACSR/42 ASCR & 49 AAAC which is good for about 2MVA. There are fault rating issues associated with this small line but for say 1MW connection we discussed it is probably okay. Once we have firm details we can do some more detailed checks.

Helensville substation is 22km from Silverdale GXP and the lines are good for around 27MVA. Even with the largest conductor, the capacity of a 33kV line is around 50MVA. The Transpower 220kV and 110kV are approx 2km from Helensville zone substation. If you were to build a new 220kV line from South Head, you could probably get about 300-400MVA of capacity. The cross isthmus 220kV cable are rated at 500MVA.

John, I trust this meets your initial requirements

Tēnā koe John i nga ahuatanga o te wa

Thank you for your letter of 25th December 2006 and the information about the liquid hydrogen carbon energy economy; and specifically the *Platinum Energy Sea Power Pilot Project*.

I want to also thank you for sending me the compendium of papers, entitled Maori hapu Customary Title.

I would be interested in being advised as to when the public consultation hui will take place at Puoto marae regarding the aqua farm proposals for Pouto.

I presume that you will have been fully involved in the consultation exercise embarked upon by Crest Energy Limited, relating to the Kaipara Marine Turbine Generation Project. As I understand it submissions were to be made to the Northland Regional Council by Friday 12 January 2007. You are quite right, as you stated in your letter to Anihera Delamere (Waitangi Tribunal) that this hardly leaves sufficient time over the holiday period for the public to be able to present considered submissions in response to the Crest proposal.

John, I would appreciate some more time to consider your proposal, and will no doubt be in touch with you again at a later stage. I would, of course, be interested in being kept informed about progress made regarding investment possibilities; and any new developments that may occur in the housing project as they come to hand.

Heartfelt plea for organ donors

'Living proof it works'

by Wynsley Wrigley

ROSS Chatterton was not expecting to be the first visitor to see his former schoolteacher Eric Hannah after his heart transplant in Auckland last week. (see page 1)

Mr Chatterton, 35, would have been a very well-informed visitor. He too had a heart transplant in Auckland back on June 6 while his father Bruce, who lives in Sydney, also had a heart transplant only three weeks ago.

Ross Chatterton saw Mr Hannah's name on a door in the residents' hall and said it was hard to believe the man he was visiting was his former schoolteacher.

Before his own transplant Mr Chatterton had been sick for two years after collapsing early one morning in 2003.

One Friday in early June 2005, he was told he was on the active waiting list for a heart transplant.

He was to be packed, and ready to travel to Auckland at any moment.

The call came the next Monday at 9.30pm.

Time was critical. By 12.40am on Tuesday he was flying to Auckland and at 7.30am the transplant began.

On arrival in Auckland Mr Chatterton was greeted in a four-bed hospital room by a man who told him, "you're going to get the heart" while another person was told

"you're going to get the lungs". Mr Chatterton said he was terrified as he went into theatre.

His mother Lyn Ingoe said he tried to hide his feelings by telling jokes.

She said his first words after the operation were about a 17-year-old Whangarei youth who was to receive two new lungs.

"How is young Simon?" he said.

The two have since become "twins", with organs from the same donor. Two other patients received new hearts in June and all three went on to complete the now traditional post-transplant walk up One Tree Hill.

"I have made friends the length and breadth of New Zealand," said Mr Chatterton.

His father was on a heart machine in Sydney for seven months before his transplant three weeks ago.

Mrs Ingoe said there was a hereditary link between father and son and their illnesses.

It had been a terrible experience watching her son battle heart disease.

"We could see him physically dying.

"All of a sudden, that phone call and everything happened so fast."

Some people have been waiting three years for a transplant, she said.

"I never thought of losing him when the phone call came through."

Mrs Ingoe said the family were organ

Lyn Ingoe and her son, heart-transplant patient Ross Chatterton, encourage other people to become organ donors. Picture by Paul Rickard

donors and made an impassioned plea for others to do the same.

"Without organ donors, this cannot happen.

"This is living proof, this does work.

"We want people to be aware and to support organ donations," she said.

Mr Chatterton knows of two other

Gisborne people who have had transplants this year in addition to himself and Mr Hannah.

He is feeling well but knows his immunity levels are significantly lowered.

He has to watch what he eats and will need medication for the rest of his life.

But now he is looking for a job.

Hui to look at uses for Maori land

Huge scope to earn many millions of dollars

by Alice Te Puni

DEVELOPMENT plans for Maori land in the East Cape region will be discussed during a three-day hui at Awatere Marae over Labour Weekend.

Aquaculture farming, power generation and erosion-control projects are a few items on the agenda to boost employment opportunities and encourage the return home of Tuwhakairiora descendants to their Marangairoa lands.

For the past five years, Maori entrepreneur John Wanoa from Auckland, has nurtured a vision of prosperity for his people.

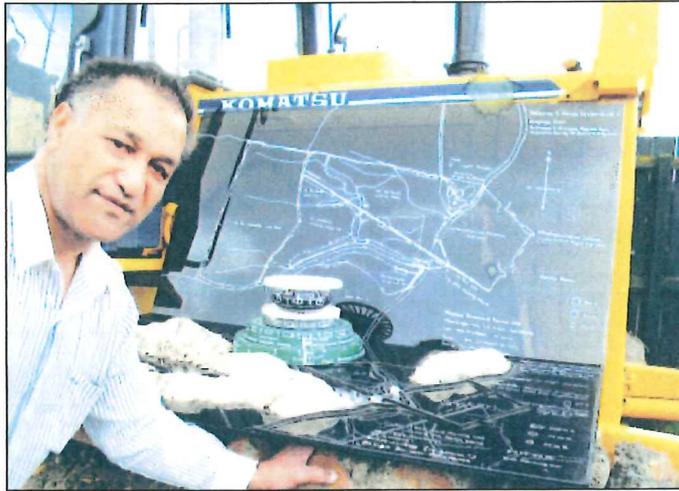

With support from the Tuwhakairiora taumatua kaumatua (tribal elders) Mr Wanoa will facilitate at next weekend's hui, whakapapa property rights, customary land development and title ownership discussions.

He will also present a self-designed wind/waterfarm and aquafarm tank model and project plans.

The initiative's proposed location is the 382.7-hectare Marangairoa C12 site at the eastern tip of the North Island.

"All of that flat area of land are wetlands which are suitable for aquafarms and the storage of tons of seawater for electricity power generation. This is just a small part of the overall kaupapa.

"The idea is to form a Tuwhakairiora Co-operative Company Group to encompass whanau/hapu involvement. The profits will go directly back into the whanau/hapu community to encourage the development of other Marangairoa land block developments. This will provide capital for starting other agriculture and horticulture projects for top-quality export.

Maori entrepreneur John Wanoa, pictured with a self-designed wind/waterfarm and aquafarm tank model and project plans for the East Cape, has a vision of prosperity he wants to share.

"We are talking millions and millions of dollars, offshore investments, international partners, employment opportunities for hundreds of people. The scope is huge."

Mr Wanoa said the new initiative would provide work for the home people and attract others back to their ancestral lands.

"People don't want to come home unless

there is something they can do. They need towards something positive to work on and work towards.

"Coming home is not an option for East Coast people with very few employment opportunities currently available. It is in the too-hard basket. They will only come home for a visit, if that."

The 56-year-old who was born and brought

up at Whakaangi will return home next year to help implement the setting up of the new projects. He encourages whanau/hapu members to do the same.

His relocation will be determined by decisions made at the hui, he said.

His main aim was to educate whanau/hapu members by showing them what they could do with their land.

"I am coming home to show them how it can be accomplished."

The socio-economic development plans must utilise skill-based whanau/hapu members, he said.

"I need to find all the ones who have the skills and experience to work the land."

Mr Wanoa is helping to set up similar projects in the Far North and Nelson.

"It isn't a new wheel being invented. Only dusted off and shone up somewhat. Our tipuna were great traders. It's instinct. Only we can carve out our destiny. What is good for Maori is good for everybody."

Mr Wanoa has spent a number of years setting up a database of original Marangairoa landowners of which he believes 1500 are listed. He has sent out invitations to 134 affiliates and encourages all descendants to spread the word and attend the hui.

"What I am trying to do is identify ourselves first. I have some ideas and so do others.

"What we need to do is group all these ideas together."

Increased numbers on the Maori electoral role for this year's election had assisted his collection of contact details and register information.

Next weekend's hui is specifically aimed at Tuwhakairiora descendants and invited guests only.

LOOKING AHEAD

Focus on the Land has more news and pictures from the Poverty Bay A and P Spring Show.

We also look at a large sheep and beef farm that has come on the market in this region and have a story about a genetic breakthrough poised to save thousands of lambs that perish each year in freezing weather.
